Projects

StoneCloud - Music app inspired by SoundCloud

[Live](#) | [GitHub](#)

Ruby on Rails, Postgres, AWS, React/Redux

- Generates custom waveforms using the wavesurfer JavaScript library and gives them click event listeners, allowing users to navigate tracks.
- Synchronizes play/pause buttons, waveforms and progress bar by appending the track ID to the HTML element ID's.
- Authenticates users using the BCrypt Ruby gem.

Droog - Audio visualizer

[Live](#) | [GitHub](#)

JavaScript, HTML, CSS

- Generates dynamic waveforms, which can be displayed as either oscilloscopic or concentric waves.
- Uses the HTML5 web audio API to extract frequency data from audio input and passes data to the d3 Javascript library to render waveforms.

DOMController - HTML DOM manipulation library

[GitHub](#)

- Allows user to traverse and manipulate HTML elements by various types of selectors.
